

## Field Services

Capital City Renewables provides installation, maintenance, relocation, and sales/rental services for solar resource assessment and monitoring stations, including:

Both pre-construction resource assessment and operational performance monitoring (per IEC spec.) are available.

## Reliability & Accuracy

To ensure reliable data recovery in the most challenging climates, Capital City Renewables will size your PV and battery requirements for your station. We will arrange for proper sensor cleaning intervals.

CAPITAL CITY

North and South America

Installation, Maintenance, & Removal of all Met Towers  
Outstanding Safety, Professional Quality, Reasonable Cost

## Optional Add-Ons

Capital City Renewables can install add-on kits as part of your station to measure:

- Module soiling
- Albedo

## Data Management

Capital City Renewables offers data monitoring and management services for solar resource assessment and monitoring stations. Let us detect outages and faulty sensors sooner. We deploy quickly to keep data recovery rates high. In addition to field services, we offer support for:

- Cellular & satellite data plans
- Fleet management and refurbishment
- Measurement campaign design
- Data collection and analysis
-  Fulcrum3D FlightDECK

...and more!
